EXPERIENCE

PYECLIPSE SOLUTIONS | AWS DEVOPS ENGINEER

Sep 2024 – Present | Indore, India

- Developed and automated CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time by 50%.
- Provisioned AWS infrastructure with Terraform and CloudFormation, cutting provisioning time by 60% and optimizing costs.
- Deployed microservices using Docker and Kubernetes on AWS ECS and EC2, increasing uptime and scalability.
- Implemented Prometheus, Grafana, and the ELK Stack for monitoring and logging, reducing incident response time by 40%.
- Enforced IAM best practices by configuring security groups, encryption policies, and role-based access controls.
- Reduced AWS costs by 25% through instance right-sizing and automated scaling policies.

PROJECTS

AUTOMATED AWS INFRASTRUCTURE DEPLOYMENT |

PERSONAL PROJECT

- Created reusable Terraform modules to provision EC2, S3, and RDS resources using best practices.
- Automated full-stack infrastructure setup using CloudFormation for reproducible environments.
- Learned and applied AWS networking: VPCs, subnets, route tables, NAT gateways, and security groups.

CI/CD FOR MICROSERVICES | PERSONAL PROJECT

- Designed a Jenkins pipeline to build, test, and deploy Dockerized Node.js microservices on AWS EC2.
- Integrated GitHub Actions for linting, unit testing, and container image builds.
- Used Docker Compose and YAML workflows to manage services and pipelines.

CLOUD SECURITY AND IAM OPTIMIZATION | LEARNING-BASED PROJECT

- Wrote IAM policies in JSON to enforce least-privilege access across AWS services.
- Enabled AWS GuardDuty and AWS Config to detect misconfigurations and threats.
- Created a compliance checklist for small-scale AWS environments.

MONITORING WITH ELK & PROMETHEUS | HOME LAB PROJECT

- Set up a Docker-based monitoring stack with Elasticsearch, Logstash, Kibana, Prometheus, and Grafana.
- Visualized system metrics (CPU, memory, network) from multiple virtual machines using Node Exporter.
- Built custom Grafana dashboards and alerts for real-time infrastructure monitoring.

EDUCATION

GOVT. ENGINEERING COLLEGE, JABALPUR

B.TECH IN INDUSTRIAL & PRODUCTION ENGINEERING

Graduated: April 2023

SKILLS

CLOUD PLATFORMS

AWS (EC2, S3, IAM, ECS, Lambda, VPC, CloudFormation, CloudWatch, Route 53)

IAC & AUTOMATION

Terraform • CloudFormation • Ansible

CONTAINERIZATION

Docker • Kubernetes

CI/CD & SCRIPTING

Jenkins • GitHub Actions • Bash • Python (Beginner)

MONITORING & LOGGING

Prometheus • Grafana • ELK Stack • AWS CloudWatch

VERSION CONTROL

Git • GitHub • GitLab
